

MEET SPROUT

A pencil that wants to be a plant when it grows up

WRITE

DULL

SHARPEN

TOO SHORT?

PLANT YOUR PENCIL

Gently press Sprout into the soil, tip-side up. Push it in up to the edge of the green tap.

Make sure to place the pencil sideways so the plant can grow straight upwards. After 1-2 days move pencil stub to a different place. This will allow the seeds even better conditions for sprouting.

ADD WATER, SUN & LOVE

WATCH IT GROW & GROW
